ABOUT ME

What I really love to do is working with everything related to web, especially when we are talking about front-end. Javascript is an incredible world of possibilities, and I am fascinated by that. I like to solve problems always trying to choose the best alternative, but sometimes we need to deliver then, refactor! I enjoy working on small teams, I think we can make big things working with a few incredible minds. A few words can describe my skills:

- Great experience in web design, web development, and graphic design.
- Specializing in W3C web standards based markup, utilizing semantic markup for structure and CSS for presentation.
- Always trying to learn a new crazy-last-week-mini-framework or creating new mini-ones
- Experience as a team leader
- Worked with remote teams
- Adaptive to new applications and technologies.

MY EXPERIENCE

For a full list of companies that I worked, please visit <http://linkedin.com/in/djalmaaraujo/>
